Contractor Compliance Checklist

12-point verification before contractor mobilization

GROUP 01 Safety & Certification

- ☐ **01**
COR (Certificate of Recognition)
Current and valid for the contractor's work scope. Confirm the certificate covers the specific trade or service being performed.
- ☐ **02**
WCB Clearance Letter
Dated within 30 days. An expired letter means you could be on the hook for their workplace injury claims.
- ☐ **03**
ISN / Avetta / ComplyWorks Status
Green or approved in whichever contractor management system your company uses. No exceptions, no "pending" statuses.

GROUP 02 Insurance & Bonding

- ☐ **04**
Commercial General Liability (CGL)
Minimum \$2M coverage with your company named as additional insured. Confirm the policy is active and covers the work location.
- ☐ **05**
Automobile Liability
Minimum \$2M for any vehicle work on site. Required if the contractor operates any vehicles as part of the scope.
- ☐ **06**
Professional Liability (E&O)
If applicable to scope. Required for engineering, consulting, or any professional services where errors could cause financial loss.
- ☐ **07**
Bonding Capacity
If required by contract value. Verify the contractor can obtain performance and payment bonds for the contract amount.

GROUP 03 Contract & Rate Verification

- ☐ **08**
Signed MSA or Subcontract Agreement
Fully executed before work starts. No handshake deals, no "we'll get to it." Unsigned agreements mean zero legal protection.
- ☐ **09**
Rate Schedule
Confirmed and attached to the agreement. Every labour category, equipment rate, and markup should be documented and agreed upon in writing.
- ☐ **10**
Scope of Work
Clearly defined with exclusions noted. Ambiguous scope is the number one cause of change order disputes and cost overruns.
-

GROUP 04 Mobilization Readiness

- ☐ **11**
Key Personnel Qualifications
Tickets, certifications, and drug & alcohol clearances for all personnel assigned to the project. Verify before they set foot on site.
- ☐ **12**
Equipment Certifications
Current inspection and certification for all equipment coming on site. Expired certs mean your company carries the liability if something fails.
-
